

CS18

Audio Visual DMX512 Control Panel Smart

Description

The CS18 Smart Audio & Visual DMX512 Control Panel integrates lighting, audio, and entertainment control into a single intelligent platform. Designed for karaoke rooms and private entertainment venues, it enables seamless coordination of DMX lighting, audio-triggered effects, VOD playback, and scene management, providing a convenient and immersive user experience.

Features

- Integrated Central Control: Combines audio, lighting, and entertainment control in a single intelligent system.
- DMX512 Lighting Control: Supports direct connection and control of lighting fixtures with DMX512 interfaces.
- Audio-Triggered Lighting: Supports audio detection with up to 32 programmable audio scenes for synchronized lighting effects.
- VOD Integration: Supports VOD playback control through compatible wall control panels for seamless entertainment management.
- Microphone Trigger Support: Compatible with microphone trigger power boxes for interactive lighting control.
- Service Light Control: Supports connection and control of service indicator lights.
- Infrared Amplifier Control: Supports amplifier infrared control with programmable command storage.
- External SD Card Storage: Supports external SD card program storage without limitation on the number of steps for a single lighting scene.
- Smart Room Lighting Control: Enables intelligent lighting control for private rooms through compatible wall-mounted control panels.
- 220V Power Input: Designed for stable operation with a 220V power supply.
